Luxembourg Online

Over 30 years of experience

Luxembourg Online, founded in 1995, is one of Luxembourg's leading telecommunications providers. We specialize in providing Internet access, landline and mobile phone services, television, and the development of networks and IT applications.

As a 100% privately owned Luxembourg company, our workforce consists of over 100 employees spread across three locations throughout the country. We hold an A license and operate our own network in the Grand Duchy.

10 years of service to businesses

To provide you with impeccable service, Luxembourg Online has established a dedicated sales team for business customers. Closer to you, more responsive, and more efficient, our corporate sales representatives are available to assist you by phone, email, or in-person appointment. They are committed to listening to your needs and advising you—a commitment we've upheld for over 10 years.

High-quality customer service

Luxembourg Online delivers top-tier services through its multilingual helpdesk. This service, based in our offices, allows us to ensure quick response times and provide you with quality service. Our staff will be happy to advise you and answer all your questions.

On-site Support

Our technicians are all trained to provide efficient on-site troubleshooting and are able to advise you on any technical issues. In addition, if needed, Luxembourg Online offers support options specifically designed for businesses. These options guarantee priority service and ultra-fast response times.

A trusted provider

To date, more than 30,000 customers—both businesses and individuals—trust us with their telecommunications solutions.

(2) Offers valid for all new subscriptions subject to a 36-month commitment. Prices shown in € excluding tax.

FIBER

- High-performance internet access up to 2 Gbps.
- Unlimited traffic, with no data caps.
- Guaranteed continuous connectivity with the Managed 4G Backup Pro option: Features automatic failover to 4G in the event of a loss of primary internet access. No installation requirements or deployment delays.
- Shorter response times with our SLA options: Service levels guarantee priority response times with assistance within 4 or 16 business hours as needed.
- Optional fixed IP address :
 - A Fixed or Static IP: your modem/router's IP address remains constant ;
 - or
 - A Range of Fixed IP Addresses : you can have multiple fixed IP addresses assigned to different devices, allowing them to be directly accessible from the internet.

TELEPHONY

- Collaborate without limits with next-generation landline telephony.
- A comprehensive, secure, cloud-based business telephony solution.
- The solution is available on landline phones, mobile apps, and PCs.
- Users with the mobile app : With the mobile app, your office phone goes wherever you go! You can be reached at your usual extension and communicate with your colleagues at no extra cost, whether you're in the office or on the go.

MANAGED 4G BACKUP

The assurance of a constant connection.

- ✓ **Constant connection** with automatic switching to 4G in the event of a loss of primary Internet access.
- ✓ **No installation requirements** or deployment delays.

How It Works

The Mikrotik router includes a 4G module. As soon as the router detects a connection outage, it **automatically switches your Internet access to the 4G network**. This allows you to continue using your Internet services. When the Fibre Pro connection becomes available again, the router disables the 4G mobile connection and switches access back to the primary connection.

Fixed IP Address Management

Luxembourg Online's Managed 4G Backup also **allows you to retain your fixed IP address or range of fixed IP addresses** in the event of a failover to the 4G connection. This ensures that all your services continue to function properly.

OUR SUPPORT OPTIONS

Guaranteed priority service, with faster response and resolution times.

This option reduces response times and guarantees you support within 4 to 16 business hours. Our technicians are available by phone and on-site as needed, 7 days a week.

	SLA 16H	SLA 4H

FIREWALL

Protect your business from cyber threats

Essential Network Security

Today, a simple router is no longer enough. Cyberattacks are evolving. Your security needs to evolve too.

✓ **The firewall protects your network, your data, and your access.**

Why do you need it?

A router connects. A firewall protects.

- ✓ Advanced traffic analysis (down to the application level)
- ✓ Real-time threat blocking
- ✓ Protection against viruses, intrusions, and attacks
- ✓ Web filtering and access control

Continuous active safety.

Comprehensive network protection

The firewall acts as a shield between your business and the internet.

Monitoring of incoming and outgoing traffic

Advanced threat detection

Application filtering (web, video, apps)

Compatible with your existing infrastructure

- ✓ Works with your existing router
- ✓ Ideal for small and medium-sized businesses and multi-site operations
- ✓ Quick deployment

A solution that adapts to your needs

Intelligent, scalable, and customized security.

- ✓ **Secure remote access (VPN)**
- ✓ **Site-to-site connectivity**
- ✓ **Network segmentation (guest Wi-Fi, internal, etc.)**

Threats detected, immediate action taken

The firewall continuously analyzes your traffic:

- ✓ **Intrusion attempt > automatically blocked**
- ✓ **Suspicious activity > real-time alert**
- ✓ **Unauthorized access > immediately denied**

Security That's Always Up to Date

Threats evolve every day. Your protection does too.

- ✓ Regular security updates.
- ✓ Threat databases updated continuously.
- ✓ Proactive monitoring.

A Turnkey Service

- ✓ Installation and configuratio.
- ✓ Integration with your network.
- ✓ Monitoring and maintenance.
- ✓ Dedicated technical support.

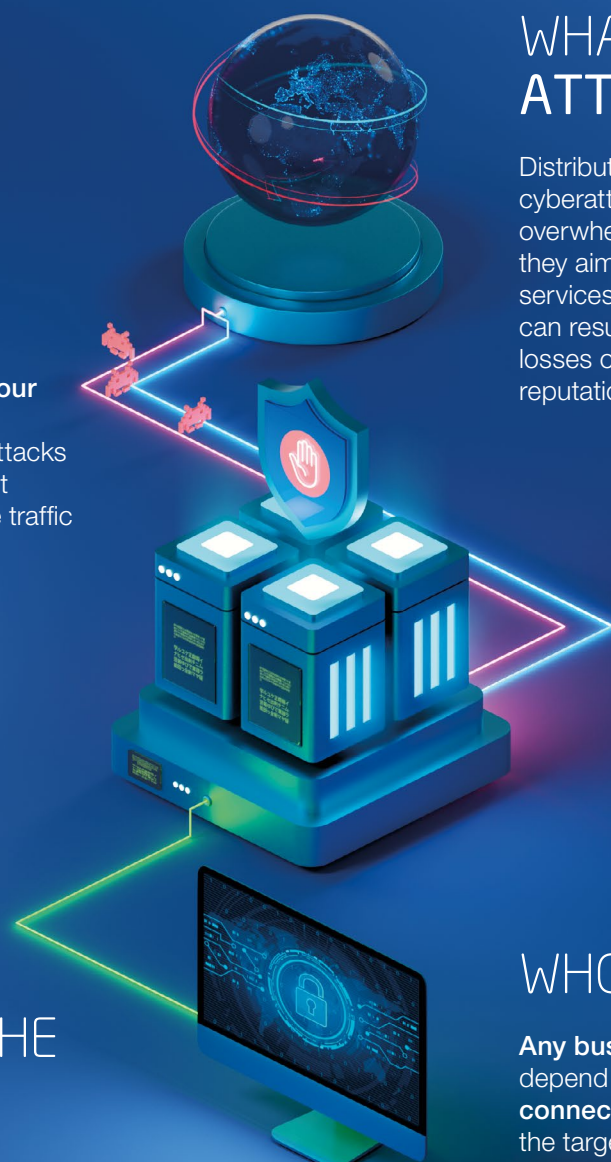

You get a comprehensive solution, without the complexity.

OUR DDOS MITIGATION SOLUTION

Protect yourself from cyberattacks and keep your network accessible.

OUR DDOS MITIGATION SOLUTION

Luxembourg Online's DDoS Mitigation solution **protects your infrastructure and Internet services** against volumetric attacks by blocking illegitimate Internet traffic while allowing legitimate traffic to pass through.

WHAT IS A DDOS ATTACK?

Distributed Denial of Service (DDoS) cyberattacks are common today. By overwhelming network bandwidth, they aim to render one or more services unavailable. These attacks can result in significant financial losses or, indirectly, damage the reputation of the targeted company.

WHO IS ELIGIBLE?

Any business whose operations depend on a network infrastructure **connected to the Internet** can be the target of a DDoS attack.

BENEFITS OF THE SOLUTION:

- ✓ 24/7 Service
- ✓ Real-time analysis of internet traffic
- ✓ Automatic detection of traffic anomalies
- ✓ Proactive mitigation of traffic anomalies
- ✓ Secure internet access
- ✓ Solution operated 100% in Luxembourg

BUSINESS WI-FI

No matter the size of your premises, enjoy a high-performance network.

A SOLUTION SPECIALLY DESIGNED FOR THE OFFICE

The WiFi Mesh system uses a high-performance tri-band repeater designed to **extend the WiFi coverage of your existing system**. By acting as a relay point, you benefit from the **same network name and seamless roaming**.

You have the option of using repeaters or wireless access points (WAPs).

Repeater Setup

Repeaters pick up and amplify the existing Wi-Fi signal wherever you place them. Setup is very simple: just plug the units into any available power outlet and configure them with a single click.

WAP Installation

Wireless access points (WAPs) are connected to the modem via an Ethernet cable and broadcast the Wi-Fi signal. **The WAP installation is the solution recommended by Luxembourg Online.**

Our equipment

UniFi 7 Pro

Fritz! Repeater 6000

Why choose a WAP installation?

- ✓ Full Wi-Fi coverage
- ✓ Consistent and more stable connectivity
- ✓ Optimal Wi-Fi signal

OUR MOBILE PLANS

Stay connected at all times in Luxembourg or across Europe.

		Combine with an internet plan and save -4,27 €/MONTH ⁽⁵⁾	Combine with an internet plan and save -4,27 €/MONTH ⁽⁵⁾

*Prices listed in € excluding tax.
(1) Excludes calls to special numbers (such as 800, 900, gaming, televoting, adult services, etc.) and premium-rate text messages.
(2) Data usage outside the plan: €0.0513 per MB.
(3) All plans are subject to a fair use policy to ensure network availability and quality for everyone. The limit is set at 3,000 units for LOL MOBILE L and 3,000 for LOL MOBILE UNLIMITED. Overage SMS: €0.06 per SMS. Outgoing calls: €0.19 per minute. Excludes calls to special numbers (such as 800, 900, games, televoting, adult services, etc.) and premium-rate SMS.
(4) Mobile internet in Luxembourg, Europe, and the U.S. on 5G (subject to eligibility): unlimited (5G/4G+ speeds are reduced after the monthly 250GB threshold; thereafter, customers can continue to use mobile internet domestically without limitation and without additional charges, with speeds reduced to 512 Kb/s).
(5) €4.27 discount per LOL MOBILE L or LOL MOBILE UNLIMITED mobile subscription, provided you have an active Luxembourg Online internet connection.

LOL CLOUD PHONE

Break through the limits of business telephony with our customizable and scalable phone solution.

Collaborate without limits with next-generation landline service. Luxembourg Online offers a comprehensive solution for landlines, mobile phones, and computers.

LOL CLOUD PHONE SERVICE

A telecommunications solution that unifies all your systems and allows you to connect your company's various locations. This next-generation PBX system routes calls through Luxembourg Online's cloud service rather than through your landline.

- ✓ **No costs for purchasing or maintaining** the phone system.
- ✓ **Keep your existing phone numbers.**
- ✓ **A customized solution**, regardless of the number of extensions you have.
- ✓ **Multi-site solutions are available** using the same number, even internationally.
- ✓ Our **multilingual technical support team** is here to assist you.

Features

- ✓ Voicemail
- ✓ On-hold music
- ✓ Dial plan
- ✓ Call cascading
- ✓ Conference calling
- ✓ Call groups
- ✓ Caller ID
- ✓ Call forwarding and transfer
- ✓ Call waiting
- ✓ ICall pickup
- ✓ BLF
- ✓ ...

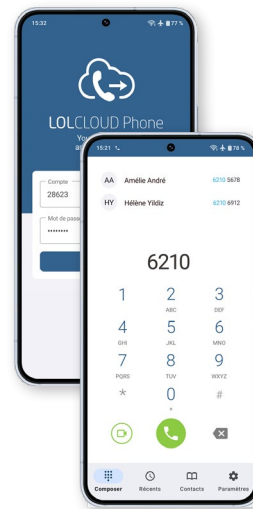

LOLCLLOUD PHONE APP

Whether you're working from home or in the office, communicate without limits.

With the mobile app, manage and use your office phone on the go without the hassles and limitations of traveling.

- ✓ **Maintain a professional image:** During a call, the app lets you display your office phone number instead of your personal number.
- ✓ **Boost your productivity:** Your landline features right on your mobile: the LOLCLLOUD Phone app provides you with a wide range of services to improve your business performance and ensure effective collaboration.
- ✓ **A cost-effective solution:** Chat with your colleagues at no extra cost, even when abroad. Make and receive calls via the cellular data network or a Wi-Fi connection, without using up your calling plan.

The LOLCLLOUD app
is available on iOS
and Android.

VIDEO CONFERENCING

Give your teams a simple, high-performance collaboration experience that works with all your tools.

Microsoft Teams, Zoom, Windows, macOS, iOS, Android

A solution tailored to your needs

In addition to this equipment, we offer a wide range of solutions to meet every need and design custom installations tailored to your environment.

Turnkey support

We advise you on equipment selection, handle installation and configuration, and integrate the solution into your infrastructure to ensure optimal performance.

Turn your computer into a desk phone
and boost your productivity.

- ✓ **Your business number on your computer:** make calls from your computer to landlines and cell phones worldwide.
- ✓ **Your office, anywhere, anytime:** you no longer need to be at your desk to access phone features and handle your business calls.

MeetingBar A10

An all-in-one solution for quick and efficient meetings.

MeetingBar A30

An immersive experience for hybrid meetings.

Meeting Rooms

- ✓ Dual cameras with smart framing
- ✓ Optical zoom with immersion
- ✓ High-performance audio
- ✓ Ideal for 6 to 10+ people

MeetingBar Pro

Advanced collaboration, both in-person and remote.

Premium collaboration spaces

- ✓ All-in-one interactive touchscreen
- ✓ Built-in microphone and speakers
- ✓ Quick setup (plug-and-play)
- ✓ Ideal for 1 to 4 people

OUR EQUIPMENT

Business phones that are stylish, easy to use, and feature-rich.

YEALINK T73W

Featuring a color display and an intuitive interface, this IP phone ensures smooth navigation for everyday use. It includes Wi-Fi and Bluetooth for wireless connectivity, while supporting multiple SIP accounts.

YEALINK T74W

Equipped with a large, high-resolution color screen, it offers advanced call management thanks to its programmable keys. HD audio with noise reduction, combined with built-in Wi-Fi and Bluetooth, ensures comfort and flexibility.

YEALINK T87W

Its high-definition touchscreen enables fast and intuitive operation. It offers advanced HD audio quality, comprehensive wireless connectivity, and support for multiple accounts, making it ideal for intensive professional use.

Yealink W80B Multi-Cell DECT Base Station

A base station designed for medium to large businesses requiring coverage across multiple floors, in large buildings, and outdoors, with the ability to move around while staying connected and accessing all company contacts from any extension.

YEALINK W78P

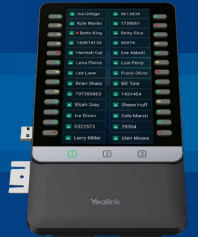

(W70B Base Station + W78H Handset)

A professional DECT solution designed for small and medium-sized businesses, offering seamless communication with up to 20 simultaneous calls, HD audio quality, broad handset compatibility, and optimal mobility thanks to Bluetooth and hands-free mode.

YEALINK CP965

A conference phone perfectly suited for small and medium-sized conference rooms. It features the latest sound quality standards and allows participants to truly immerse themselves in conversations.

YEALINK EXP55

This expansion module allows you to add a large number of programmable keys to efficiently manage lines, contacts, and shortcuts. It offers quick access to advanced features such as extension monitoring, call transfer, and direct dialing. It facilitates the management of high call volumes and improves visibility into line activity in real time.

JABRA EVOLVE2 65 HEADSET

DUO UC AND TEAMS (DECT wireless headset)

A headset designed for professional environments, featuring Bluetooth connectivity and dual connectivity. It offers optimized audio quality for calls and music, as well as long battery life suitable for daily use. Its noise-canceling microphone enhances conversation clarity, even in open-plan offices.

JABRA EVOLVE2 75 HEADSET

DUO UC AND TEAMS (DECT wireless headset)

High-end headset equipped with active noise cancellation (ANC) for greater comfort in noisy environments. It features multiple microphones for precise voice pickup and advanced audio quality. Its Bluetooth connectivity and optimized battery life make it an ideal solution for intensive and hybrid use.

IP ACCESS CONTROL

Secure your premises and track when your employees arrive and leave.

Protect Your Workplace

Secure your access points with a connected, smart access control solution designed to manage your buildings and users from a centralized platform.

⊕ **Integrated Platform:** Manage access remotely, monitor events in real time, and maintain a comprehensive overview of all your controllers.

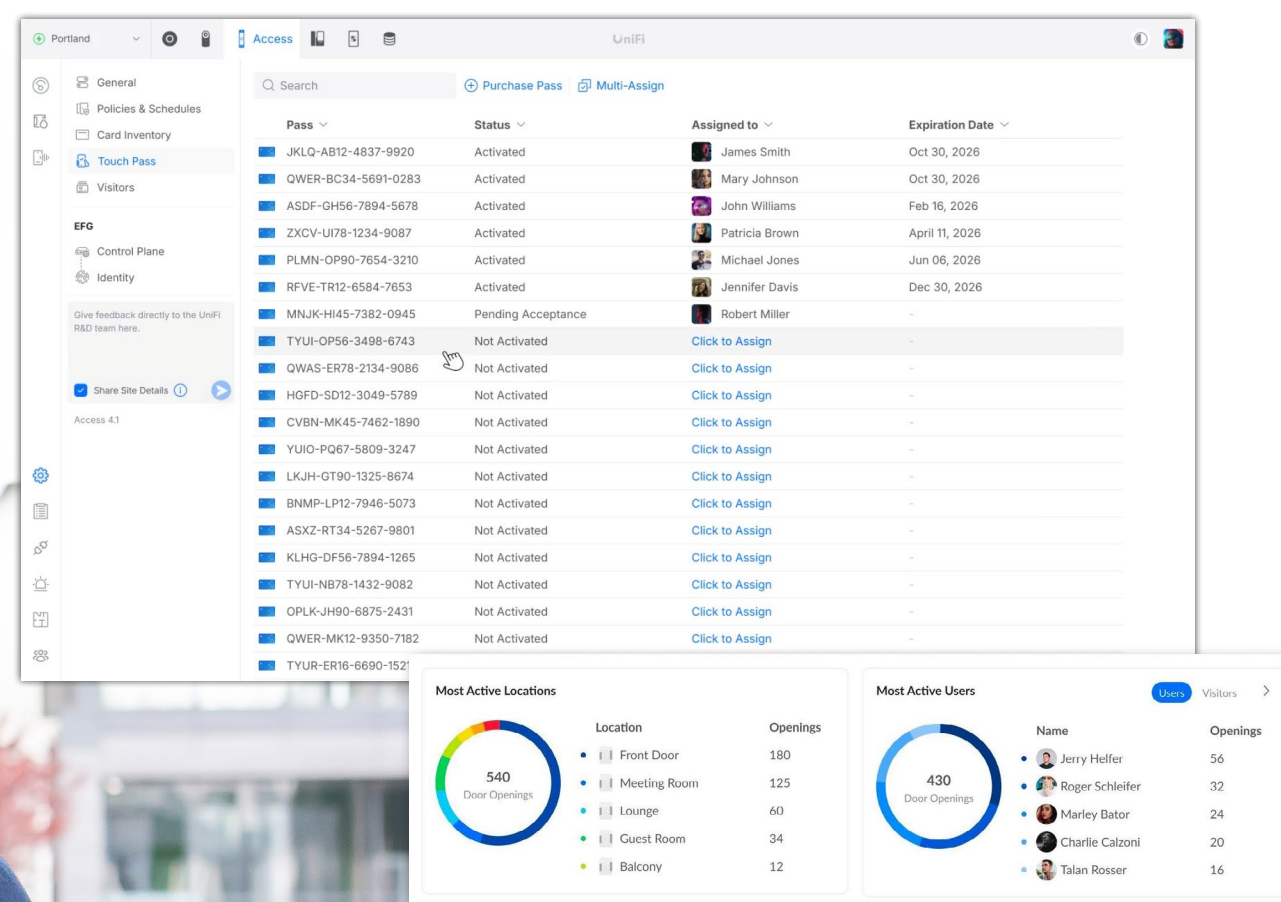

Check time logs directly from your software

Thanks to integration with the Bloobiz time-tracking module, Luxembourg Online's all-in-one cloud ERP, **make it easier to track your employees:** calculate working hours, verify break times, and monitor overtime from a centralized platform.

And much more...

Security monitoring, a complete event **history**, **remote access management**, and detailed statistics for simpler, smarter, and more efficient management.

- ✓ Control building entry and exit ;
- ✓ Replace physical keys with secure, traceable access management ;
- ✓ Grant access remotely ;
- ✓ Built-in time-and-attendance feature ;
- ✓ Track your employees' working hours ;
- ✓ Centralize access and user management from a single platform.

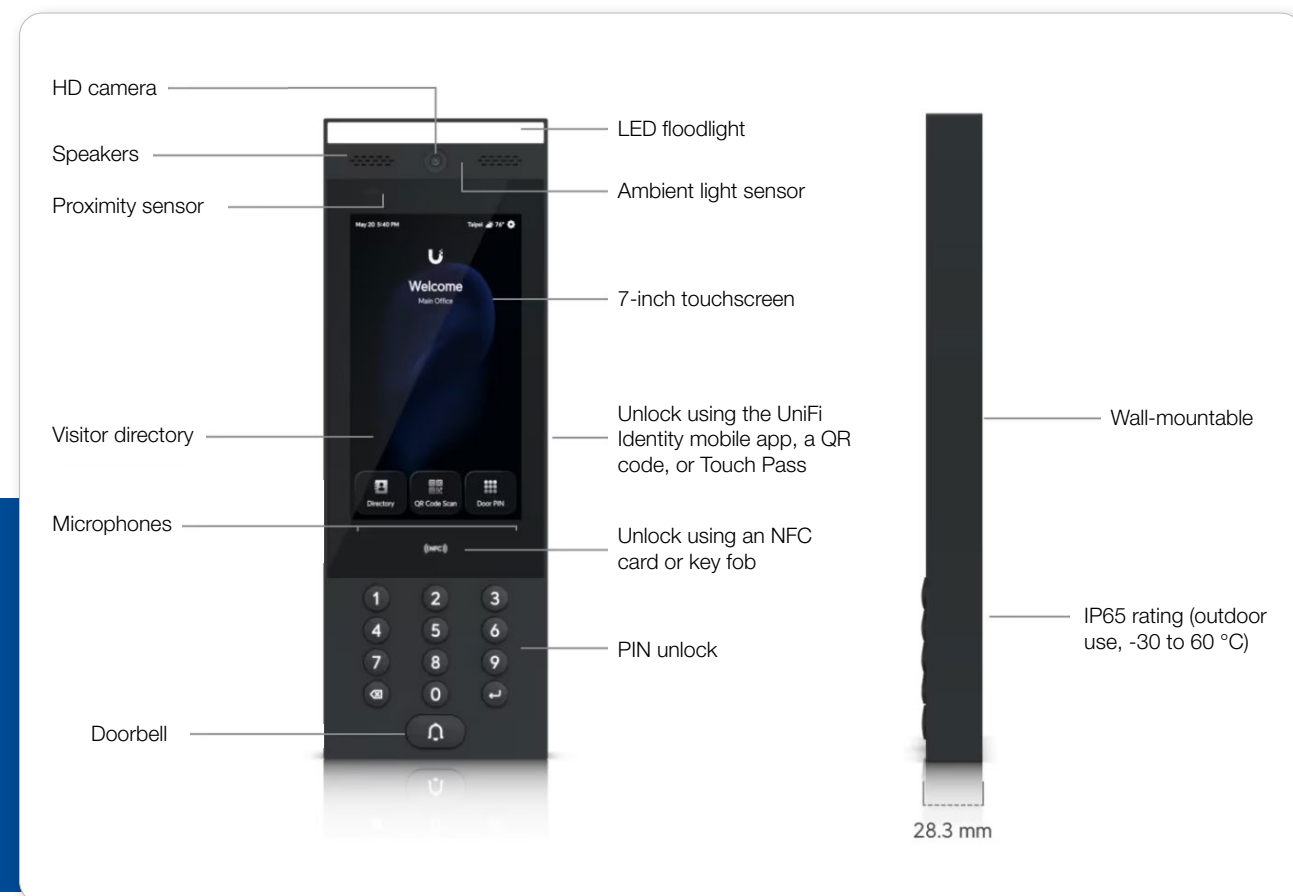

CONNECTED INTERCOM

Are you looking for a comprehensive solution?
Simplify your access management with a modern, centralized, and secure solution.

From the main entrance to the reception area, implement a solution designed to welcome visitors, manage employee access, and secure your buildings using video intercoms, access readers, and connected monitors.

Main unit with camera G3 Intercom

Next-generation IP intercom designed to secure and manage access in a simple, centralized manner. Equipped with an HD camera, a directory, and a built-in doorbell, it allows access to be granted via a mobile app, NFC badge, or UniFi Identity.

OUR OTHER MODELS

Full-featured IP video intercom G3 Reader Pro

An advanced access control solution that combines video, an NFC reader, and secure management in a single device. Ideal for securing employee access and sensitive areas.

- Built-in 12 MP camera
- 4.7" interactive touchscreen
- All-in-one access control with a single device per door
- Unlock via mobile, NFC badge, and PIN
- Compatibility with existing NFC cards
- Centralized platform for access management

Reception Monitor Intercom Viewer

Allows you to receive video calls and control access remotely from your offices or reception area.

- Real-time video communication
- Access control via a centralized interface

Compact Access Reader Access Ultra

Card reader for access control.

- Unlock via NFC badge and mobile device
- Centralized access control via UniFi Access
- Compatibility with existing NFC cards

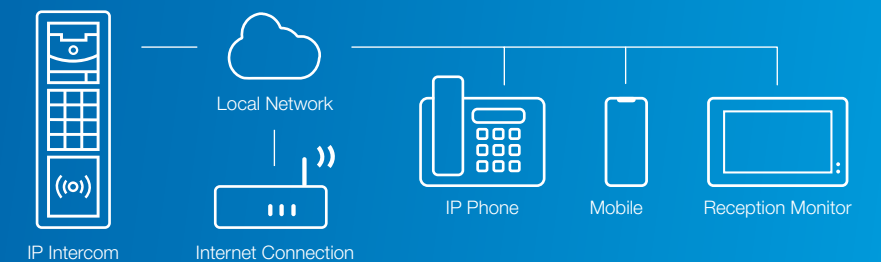

IP Video Surveillance G6 Dome

Video surveillance solution designed to protect and monitor your buildings in real time.

- HD video
- Wide-angle view
- Indoor and outdoor use

How an IP intercom system works

TIME AND ATTENDANCE APP

Clock in from anywhere!

- ✓ Do you have **mobile staff**?
- ✓ Do you need to track their **check-ins via geolocation**?
- ✓ Do you need proof of attendance?
- ✓ Do you need to bill for a service?

Our mobile app is **the solution for remotely tracking staff activity!**

Why choose our connected time clock?

- ✓ Clock in from anywhere with real-time geolocation.
- ✓ No more on-site time clocks—your smartphone replaces them!
- ✓ Track your employees' arrivals and departures in real time.
- ✓ Verify your contractors' visits.
- ✓ No installation required—just download our app!
- ✓ Track everything with your online account!

Simplify tracking of hours worked

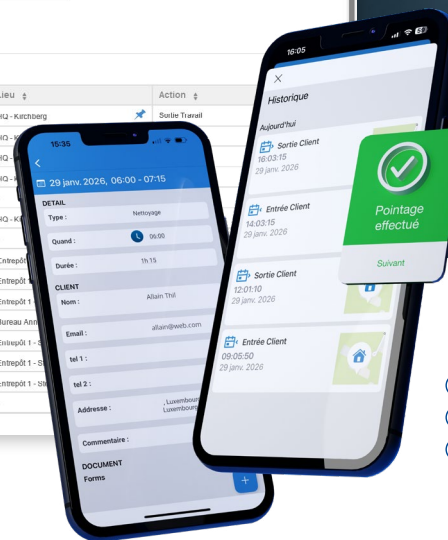

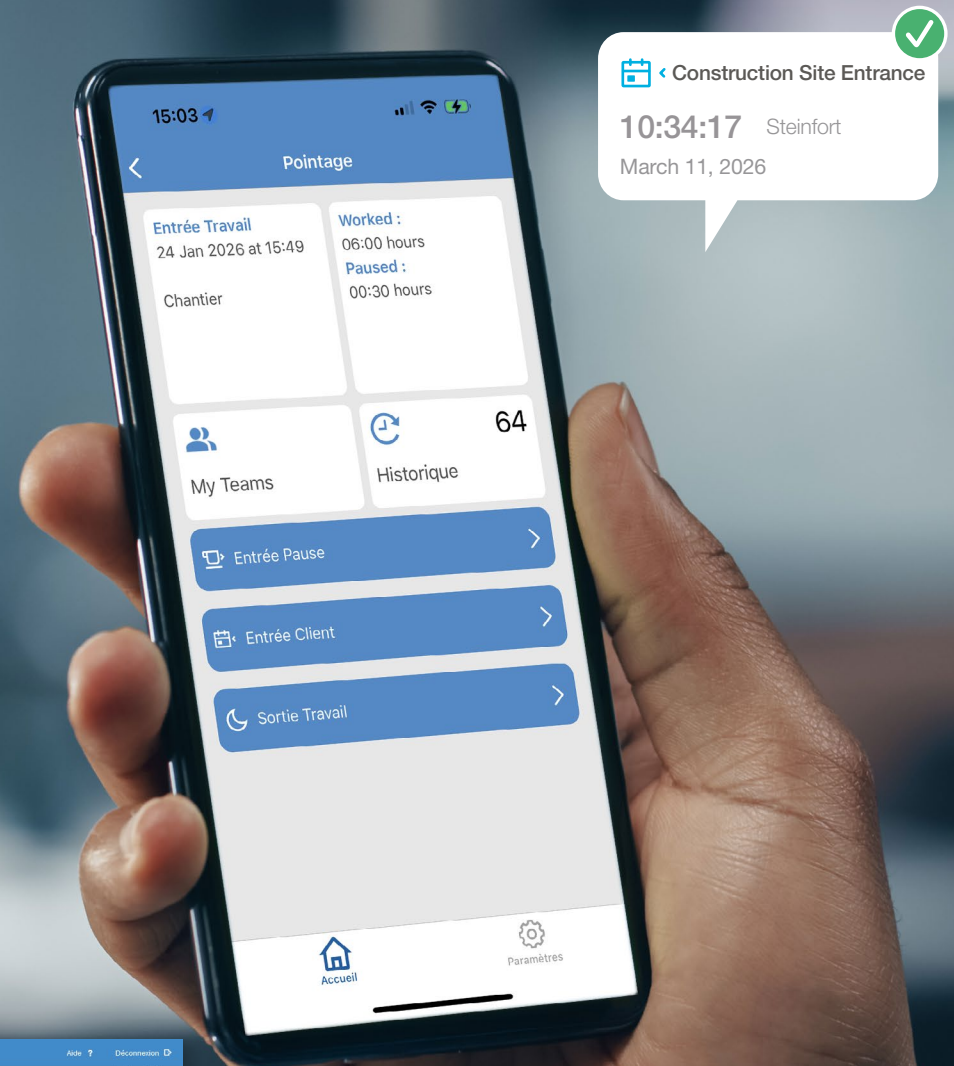

The app lets you clock in from anywhere, log breaks, justify tardiness, and even verify your contractors' visit times!

With its real-time geolocation system, the app can automatically detect your location.

✚ For easier use, you can predefine clock-in locations that will appear directly in the dropdown list!
